

Integrated Management System Policy

For over 70 years, Forbes Marshall has provided Steam Engineering and Control Instrumentation Products and Services for Industrial Efficiency.

We, at Forbes Marshall, are committed to:

- Developing Energy-Saving Solutions and Increasing Process Efficiency, thereby helping industries worldwide reduce their carbon footprint.
- Continual Improvement of our Environmental, Occupational Health and Safety Performance, including Development of Existing and New Products, Processes and Solutions that would benefit our customers.

Preventing Pollution, Protecting the Environment, Eliminating waste, identifying and reducing Occupational Health and Safety Risks are causes that are extremely important to us. We have always chosen to comply with all applicable legal and other requirements in this regard.

Our long and deep customer relationships enable development of unique and innovative Products and Services that solve real problems and improve throughput.

We strive to optimise Performance, Maintain the Highest Standard of Quality and Conserve Natural Resources through better use of Technology.

Integrated Management System Objectives:

One FM, One System

Integrating, Implementing and streamlining all our business Processes under one brand, in accordance with our Business and Legal requirements.

Improvement in IMS

Improving IMS Performance, by Creating and Implementing an 'Environment Management and Safety Management Programme' that will address significant Environmental, Safety and Occupational Health Aspects.
