Forbes Marshall Thermodynamic Trap

Description

The Forbes Marshall Thermodynamic Trap, FMTD76-M, is a maintainable high pressure thermodynamic steam trap with integral strainers and a replaceable seat to ease maintenance. It has been specifically designed for main drainage application up to 62 bar g. An insulating cover is fitted as standard to prevent the trap being unduly influenced by excessive heat loss when subjected to low outside temperature, wind, rain etc.

Size and Pipe Connections

DN15 and DN20

Screwed BSPT/NPT/BSP and socket weldable ends with IBR certificate

Optional Extras

Isotub - An insulating cover (part no 6-see overleaf) to prevent the trap being unduly influenced by excessive heat loss such as when subjected to low outside temperature, wind, rain etc.

Limiting Conditions
