

EverSense for Platten Press

Steam consumption per batch of platten presses often varies by 20-30%, resulting in increased costs.

In today's dynamic and competitive landscape, where energy costs continue to rise, maintaining an efficient steam system is imperative. An increase in specific steam consumption (SSC) per batch and a drop in condensate recovery factor (CRF) leads to incremental fuel and fresh water consumption.

SSC and CRF variation causes include:

- Design of the steam condensate system
- Uptime of components and control loops
- Operating pressures and temperature set-points
- Operating procedures
- Ply / laminate quality and type
- Batch time
- Operator experience

We provide actionable insights

Proactive Issue Resolution

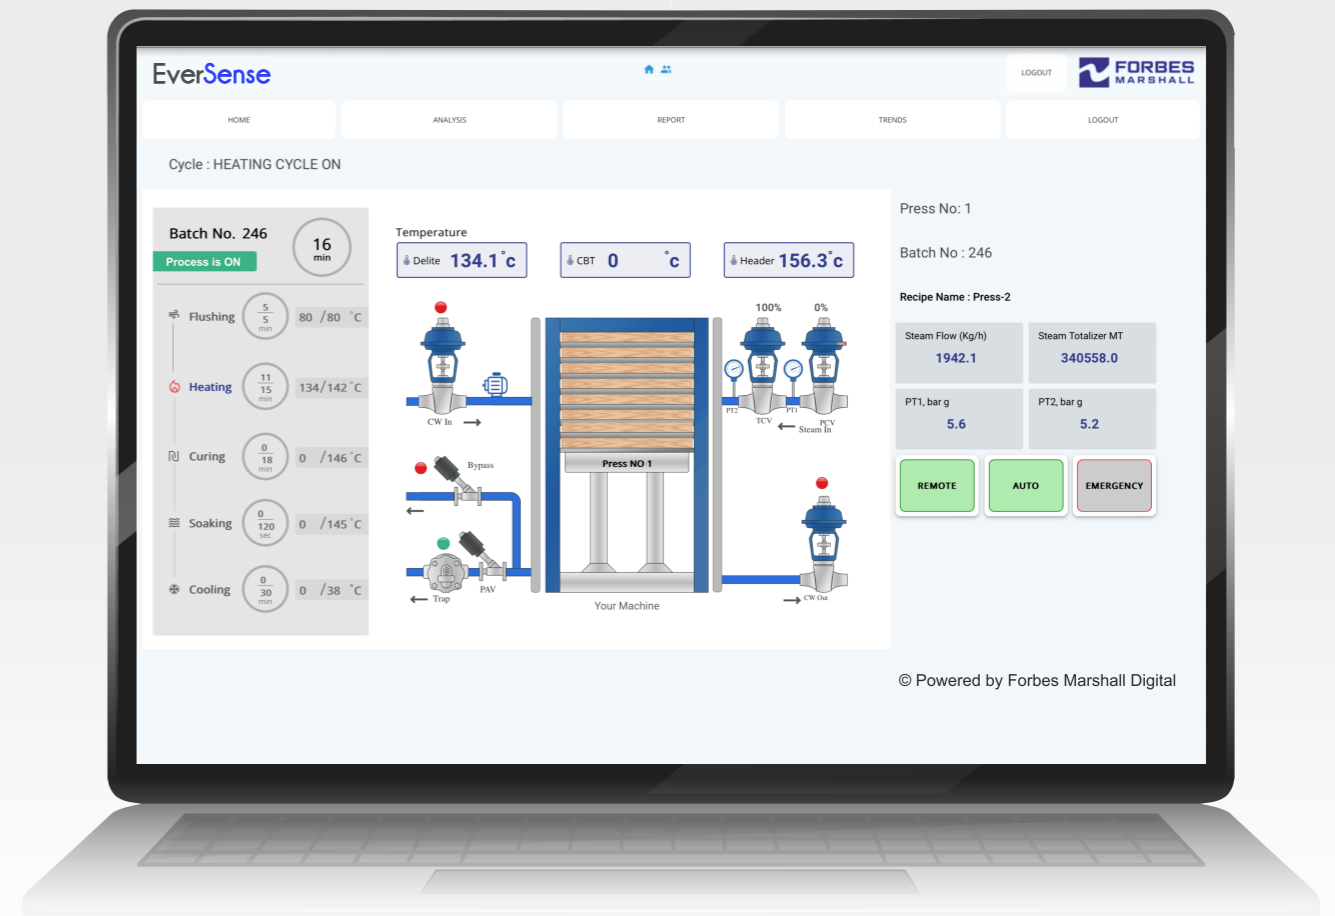

Monitoring right set points and cycle wise profile of the batch and temperatures gives us insights, enabling feedback for efficient operation and improvement in batch time and achieving higher productivity.

Operational Efficiency

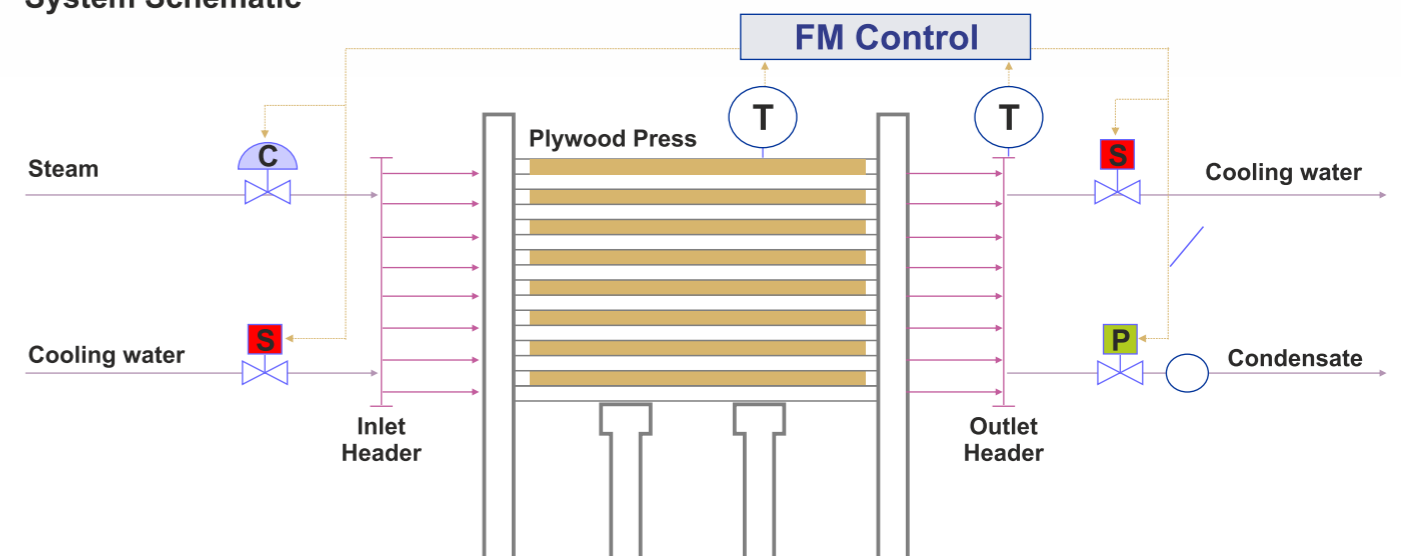

We derive real-time, tangible solutions by monitoring key parameters, to enhance standard operating procedures (SOPs) for different production levels and production types. We also provide training to operators on best practices.

Backed by our wide reach and expertise

Our team of sales and service engineers, based in 18 countries, have experience of over 30 industry segments globally. These specialists visit plants daily, understanding and addressing real needs. And now, you have 24x7 access to this expertise through both, digital connects and site visits.

System Schematic

Delivering Benefits

Reliability
Maintaining >95% uptime.

Fuel Savings
Lowering specific steam consumption and improving condensate recovery.

Productivity
Increasing productivity and bettering product quality.

Safety
Establishing standard operating procedures. Identifying anomalies in data to take immediate corrective action.

Sustainability
Reducing water and fuel consumption, and carbon emissions.

Energising Businesses and Communities Worldwide

A Multinational with Indian Roots

19	Countries
37	Offices Worldwide
18	Distribution Centres
500	Sales and Services Engineers
8,000	Customers Worldwide

World Class Technology from World Class Facilities

Enabling Results

Process Efficiency

Energy Efficiency

Optimum Productivity

Improved Asset Uptime

Environmental Responsibility
